## Improvements?

8 responses

Align the text content in mobile view so that the page text fills the width of the screen.

In English please haha

humility would be a godsend

Responsiveness for mobile. Icons to Instagram and Twitter working.

The writing is cut off when viewing from Mobile phone, can't see everything. BUT the nave bar works very well. And yes, your art is godly 😂

Make the internet forget this

I couldn't read some text on my mobile.

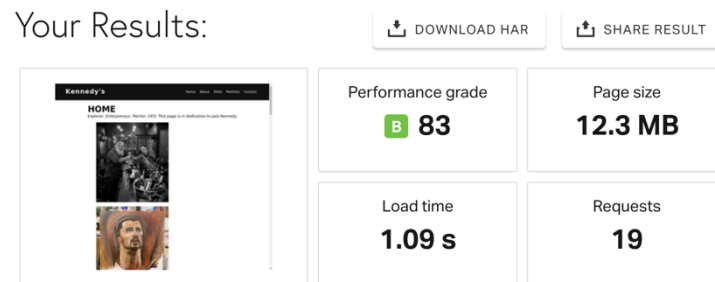

Destop site looks great! But mobile needs some work - a lot of text cut off. But the destop really looks good. Well done jack.

## Web Design Report:

The websites fast enough. There's not enough content for it to be slow.

I used *Google survey* to get my peers to assess the website and its performance.

I also used *Pingdom Tools* to get specific analytics.

### Improve page performance

GRADE	SUGGESTION	
F 0	Add Expires headers	▼
C 78	Compress components with gzip	▼
B 90	Avoid URL redirects	▼
A 100	Avoid empty src or href	▼
A 100	Put JavaScript at bottom	▼
A 100	Reduce the number of DOM elements	▼
A 100	Make favicon small and cacheable	▼

## Improvements made

I addressed all the problems that my classmates outlined in the survey. Filler was user "Lorem" which was quickly replaced. Phone functionality works okay, the issue with this feature was quickly resolved.

## Improvements required

On phone, I would like to have the paragraph not so tight to the side of the page. The problem with humility has not been resolved, it may take some time...
